If you're using a Mac, you're familiar with Photoshop. Turns out, you're also familiar with most of the problems it has caused me over the years, namely a difficult learning curve and a cumbersome workflow. So when Adobe announced Photoshop for iOS, it was my first thought: "Good news! I won't need to spend any time using an analogue crutch." Photoshop for iOS was announced on Thursday and is available for free, within the iOS App Store. That means you can join the more than 400 million users of Photoshop on desktop and other desktop platforms to dive in. The new app includes support for key Photoshop tools, such as the Touch Up Tool and the Brush Tool, which lets you edit images with your finger. Adobe Creative Cloud members can use the app with their logins from desktops (or even Android mobile devices), and there are some basic differences between the websites and apps. For example, the apps don't offer support for.ai EPS files (Adobe Illustrator files), so if you're cranking out print-ready artwork for a client, you'll have to make those changes in Illustrator first. The Adobe Photoshop Creative Cloud app for iOS looks like a typical App Store app, but there are a few differences. Your Creative Cloud account can be accessed right from the app's home screen. You can also access your Creative Cloud libraries, along with sharing and collaboration tools from iPad and iPhone devices. Photoshop CC is a collection of the most powerful Photoshop apps and effects, available on your desktop or in the cloud. And in iOS, you get Instant Access to Photoshop CC 2018. It's like being on the desktop team, whenever, wherever.
