I was more comfortable with CS5, and that's probably because of the Living Color feature. That was a tangible way to see how it worked. The more I used it, the more I saw how something as subtle as saturation and contrast could make or break a photograph. I'd always liked working with black and white, but all of a sudden I found myself with a higher level of control, and it was really rewarding. As I got more familiar, I noticed the same things again. One reservation is that Adobe hasn't perfected the controls of this tool. There are times when I miss a key command, usually because the animation hasn't finished. It's frustrating, though, because I've recently gotten familiar with the "Hue" toolset. It takes more time than I'd like, but it's been helpful in learning the new workflow. I'm not as familiar with the new Exposure tools, at least the ones in Lightroom. But what's with all the changes that are coming in this year's version of Photoshop Elements 2021? If you are looking for an update of the traditional Elements experience, are you in for a disappointment. In fact, I believe that you are. It appears that this version of the program will mostly be a richer version of the previous version. Well, at least in the way I see the concept of a feature. Actually, when I read the apparent features offered, I was hoping I had read them wrong. It seems that this version of Photoshop Elements may be one of those upgrades for no other reason than to show you what the AI can do in "an exciting way." The initial view of this software seems to be its ability to create better versions of older images by using technology to figure out things that we can't figure out for ourselves. For example: They use a neural network that I'm told can look at your images upside down and sideways to redo them. I'm not sure that I really want that, but it seems to be along the lines that I would like to see in a tool. So, is it really a new version of the software? Yes, but I believe that it is more of a re-branding than a true upgrade to the past version.
